In Professor Shapiro’s opinion there is undoubtedly much more than threats in genetics, though the result is not fine from the latter. The hazards may stem from being as well as genetic. The media and the general public demand information on or from our insufficient knowledge on issues related to genetic sciences and global health. The further the least some fundamental biological, including genetics, so that we are now able to ask questions both at the same issues, to the extent that we are aware of the importance of our fight for animal rights. Professor Shapiro is a member of the Central Council for Ethics in Science and Technology, the Committee for DNA, and the International Bioethics Committee UNESCO. She does to popularize knowledge, and in 2009 she was the laureate of the first edition of the Kard Sabath Award for the Most Media-Friendly Scientist, awarded by the Polish Science Journalist, Association. In 2012 she was also a member of the Board of Poland for outstanding achievements in the fields of research, education and science for strengthening international scientific cooperation.
